Experience the experienced:

SMS Europe Ltd are a professional, independent provider of health and safety consultancy and training. Established in 1993, Safety Management Services Europe can carry out a legally compliant noise assessment in your premises in order to help you meet your obligations under the Control of Noise at Work Regulations 2005. By law as an employer, you must assess and identify measures to eliminate or reduce risks from exposure to noise so that you can protect the hearing of your employees

Friendly and effective

Our friendly and knowledgeable consultants are people you will enjoy working with. They have proven track records of providing noise assessments and advice to a wide range of companies and premises in a variety of sectors.

Noise Exposure Action Values:

Lower Exposure Action Value: 80dB(A) LEPd

Upper Exposure Action Value: 85dB(A) LEPd

If your noise levels exceed the above you will need to do something in order to comply with the law.

The Law

- SMS Europe can carry out a legally compliant Noise assessment under the Control of Noise at Work Regulations 2005.
- Our noise assessors are competently trained in line with Noise Regulations
- Do You Know Whether You Have Noise Problem?
- Do your employees use noisy tools or machinery?
- As a guide, there are likely to be noise risks wherever you have to raise your voice or have difficulty being heard clearly by someone about 2 metres away

What does a noise assessment involve?

A competent assessor will visit your premises with a calibrated Sound Level Meter and take measurements, using standard HSE methodology, at various positions around the site where there may be a noise problem. Measurements will be taken at operator positions amongst other areas. A report will be written containing technical data on the noise generated at various points in the premises, and advice on noise control solutions will be detailed.

The report will also assess the suitability of any Hearing Protection you currently provide, or advice on which hearing protection to purchase. The Report will assess how you are meeting your obligations under the Control of Noise at Work Regulations 2005 and will contain clear, concise actions points on how to improve the noise exposure of your employees.

Contact us now on 0845 2240028 or email philip@smseurope.co.uk for a discussion about your noise assessment needs. We're here to help.
